

# Visualize your network; Secure it!

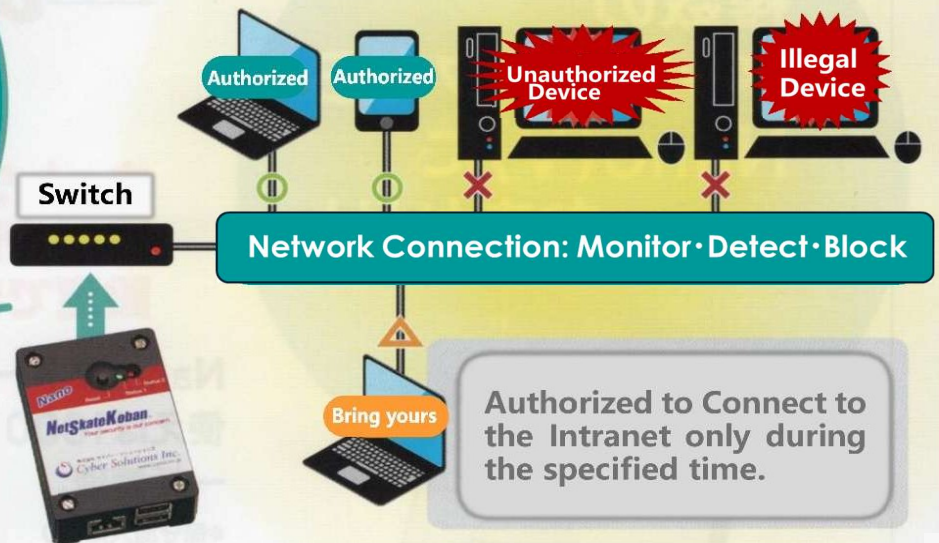

## NetSkateKoban

## The Unique Single Sensor Solution

**Plug and Play!**

**Safety &  
Security  
5 Points**

- 1 See which devices are currently connected to the network!
- 2 Block suspicious/unauthorized devices!
- 3 Check history of devices's network connections!
- 4 Generate a network map showing port-level interconnection of network devices
- 5 Detect potentially malware infected devices from the inter-device connection history.

**Visibility is power. Hidden change is the threat. Security starts here!**

**NetSkateKoban Nano will do the basic connection management and secure your intranet.**
